Durchgehend mit Knopfschraube
M8 x 90/120

5790

Paarweise Befestigung

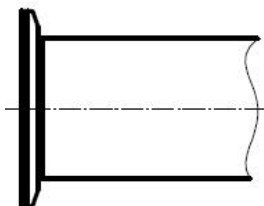

Durchgehend mit Gewindeschraube
M8 x 90/120

5794S

Einzelbefestigung

Unsichtbar mit Spreizdübel für
Holz-/ Metall-/ und Kunststoff-Türen mit
Dübellänge 20, 34 und 48mm

5494A

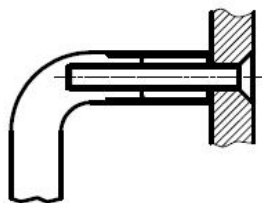

Edelstahl Scheibe

Für eine formschöne Befestigung für alle
Türenarten geeignet. Wird mit einer Gummis-
scheibe geliefert.

Types de fixation et montage de tirants

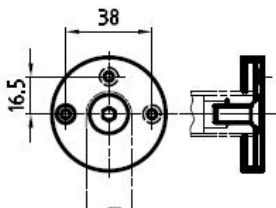

En fonction de leur entr'axe, les tirants de porte Glutz en acier inox sont disponibles dans les diamètres : 19, 25, 31 et 38 millimètres.

Outre la forme et les dimensions, le type de fixation constitue également un critère important. Les six types de fixation suivants sont disponibles :

Fixation simple

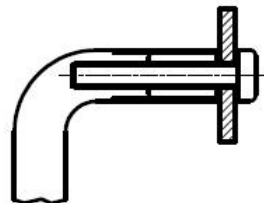

Traversante avec vis à tête fraisée M8 x 80mm

5385C

Fixation simple

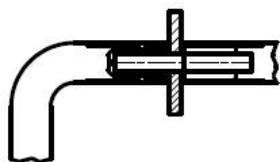

Par l'avant avec rosace clip

5791

Fixation simple

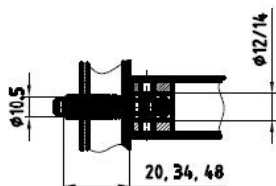

Traversante avec vis à tête plate M8 x 90/120

5790

Fixation double

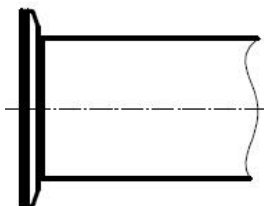

Traversante avec vis filetée M8 x 90/120

5794S

Convient à tous les types de porte et permet une fixation élégante. Livrée avec une rondelle caoutchouc.

Fixing types and installation

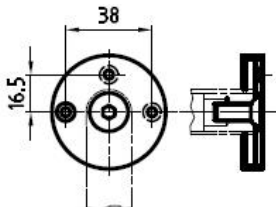

Glutz pull handles made of stainless steel are available with tube diameters of 19, 25, 31 and 38 millimetres depending on the fixing centres.

In addition to the shapes and weights, the type of fixing is also an important criterion here. The following six fixing types are available:

Single fixing

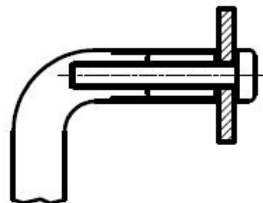

Bolt-through fixing with hexagon head bolt M8 x 80mm

5385C

Single fixing

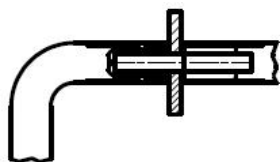

From the front, with clip-on rose

5791

Single fixing

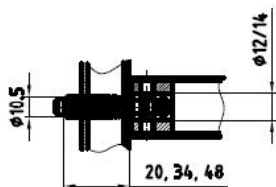

Bolt-through fixing with knob screw M8 x 90/120

5790

Fixing in pairs

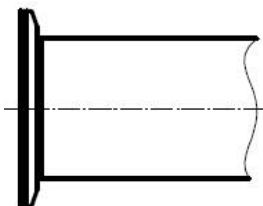

Bolt-through fixing with threaded bolt M8 x 90/120

5794S

Single fixing

Concealed, with expansion plug for wood/metal/plastic doors, with plug length 20, 34 and 48 mm.

5494A
